The Intelligencer:

BEAVER FALLS, PA.

he Product of the Cutlery Works at the Centennial - The Display of the File Works.

BEAVER FALLS, April 19. In your issue of Friday evening, April 14th, in a luminous article from the New York World headed "Indigenous Bric-a-Brac for the Centennial." I see mention is made of a knife being made by a Penn-sylvania cutler, undoubtedly referring to ork being sent to the Centennial by the Beaver Falls Cutlery Works. Now for the information of the New York World, well as for your numerous readers, I d say that the Pennsylvania citter ioned is a company whose works employment to several hundred,, and who have from one to two on dollars invested in it. And the instead of being a penknife, as the desems pleased to call it, is really a carver of the finest steel with solid bandle.

in the human body. At Kirke & Pagel's "Physiology" that dogs fed by Magendie on flour bread died in forty days; other dogs fed on bread from whole wheat meal or flour flourished and whole wheat meal or flour flourished and The knile measures nine feet at altitles in length and weighs one hundred and thirty pounds. There is also a fork to accompany it weighing thirty pounds less. This mammoth pair cost thirteen hundred and fifty dollars, the handles alone costing not less than six hundred dollars, whole wheat meal or flour flourished and throve. The three-fourths impoverishment of the mineral ingredients proved fatal to the first. The question is asked to the first. The question is asked to the same manner from living on impoverished food? The fact that wheat as an article of food, combined with fresh outdoor life, is capable of producing and sustaining the highest type of physical manhood the world every as illustrated by the history of the Roman Empire in the time of Julius Casar, which was built up and maintained by soldiers whose main article of food was wheat. Dr. Cutler also holds that it is probable that the present prevalence of decaying teeth and premature grayness or baldness are partly due to the exclusive and universal use of white carve these required eight weeks. The blade of the knife is covered ne etching, on one end a picture of at Governor, William Penn, on the of our Centennial Governor, Between these is the coat of Pennsylvania, surrounded by

r is this the only representation r Falls will have at the great show. Western File Works have already handsome sample case of black The Western File Works have already sent a handsome sample case of black walnut some ten feet in height, contain-ing specimens of their manufacture, con-sisting of files of all possible shapes and ranging from less than half an inch to nearly five feet in length. Time and space would fail me to describe this case minutely, as there is much contained in it.

1.1. It me say, however, that Beaver Falls 1.1. not, and I am sure will not be, ashamed ther products, nor have I any idea they will be exhibited under the same canva-with the two-headed calf or three-legged chicken, as the World would have it. Job.

It is time to say that the success of the

tive functions. While wheat contains, in normal proportions, every element which belongs to the tissues and organs, white flour made from wheat is a substance weakened, deteriorated and impoverished, and history shows that people eating it are more subject to tissue-wasting disease (consumption, &.,) than every before. "Why then," it is asked, "not use the whole of the original wheat, ground or reduced to a uniform condition, without loss or injury to the food elements, with its native normal bal ance and quality of mineral ingredientsin a soluble and assimilable form, as Liebig and others advocate; and such as its demonstrated undeniably and incontrovertable, by facts of history, to be capairst—There will be on the opening (the 10th of next month) a serious of American furniture at hand, and e of the foreign departments will be

some of the loreign were.

In partial chaos.

Scood—The inefficient methods of advertising adopted by the Centennial Commission, with no positive assurance against local extortions, have set people at thinking twice about spending their markets. demonstrated undeniably and incontro-vertably, by facts of history, to be capa-ble of producing the highest type of physical manhood the world ever saw. Why raise a pale, feeble, nervous and-small sized race of people upon flour be-cause four bread looks white and light, and therefore is considered nice?" But this attractive white-ness comes from starch, and the white the bread the more starch it con-tains and of course, the less nutrition.

iegro minstrel troupes and opera and neatre companies can get better terms by time of the year.

The managers of the Exhibition have, nome directions, displayed unpreced-nted ability and resources. The build-ness are excellent. Many arrangements or public convenience, health and com-port which were wanting at London, Par-sand Vienna, are nearly completed at hiladelphia. But it is a great pity if tovernor Hawley, the President of the entennial Commission, and Mr. Welsh, the President of the Centennial Board of imance, have been so much engrossed by nce, have been so much engrossed by letails of their respective depart-s as to omit any endeavor to check chensions which exist all over the that "it will cost too much to go sig Show." That widespread ap-sion to this effect prevails, fact that there is no use in ling. It is testified to by our cou exchanges from all quarters of the n, and by railroad agents in divers . These are hard times. Western thern merchants would like to with their business in New York, a r families; but if prices are too high, es and children will stay at home. airs are everywhere holding out un

Vairs are everywhere noting out un-ual inducements to keep the country ople from spending their money out-le of their own neighborhoods. The railroad companies should an-unce half-rates immediately, and the arennial Commission should publish es at and near Philadelphia.

No Machine Man Wanted at Cin-cinnati.

From Harper's Weekly.]

We have never questioned or doubted the good intentions of the President; but it can not be denied that, at least, he has been most sadly deceived and disastrously counseled. And can any one who, having had the opportunity of warning and protesting and of saving him from grievous mistakes and fatal influences, has either approved or been silent, be said to have rendered great service to the Republican party could any Senator, for instance, have performed than resisting the nomination of Shepherd, or sustaining in every way the good work of Mr. Bristow, or aiding with sincerity and vigor the President's proposal for a reform of the vivil service system? To have failed in such duties is not a great party service; rom Harper's Weekly.] and day, and noticed a lady coming up. It rice-was a windy March day, and the lady's akirts were lifted a little above her boot

was a windy. March day, and the lady's skirts were lifted a little above hee boot lops. We know the aristocratically arched foot, but hang it! what has become of the nicely rounded ankle? It wasn't there. When we got near enough to look into the lady's face we knew that snuff had done its work. Snuff is robbing women of their beauty and depriving them of husbands. It is more harmful than smoking, and more repulsive than chewing, and its use by ladies is almost as much to be condemned as the drinking of whisky by men; and if the ladies have grounds to talk about men drinking and smoking, they are assured that snuff dipping in the eyes of men is about as repulsive as the smell of a two-cent-anda-half cigar, or a sniff of "rifle" whisky to the oliactories of the fair sex.

We indulge the hope that soon there will be an anti-snuff society formed, which will be a twin sister of our temperance society. We have no idea how many ladies in our city will take exception. ivil service system? To have failed in each duties is not a great party service; or a party of intelligence and partnotism, like the Republican, is most truly erved by those who hold it to the highest standard, and commend it to the proud support of its most unselfish elements. New York cannot be recovered to the Republicans by the force of the machine. He vote of the State is too nearly balanced, the Democratic position here is too advantageous, and Republican independence and courage too inflexible, to ermit the supposition that the State can be carried by any candidate merely because he is nominated at Cincinnati. He must represent all that honorable Republicans demand, and not be absolutely identified with all that they most regret and deplore and disavow. which will be a twin sister of our tem-perance society. We have no idea how many ladies in our city will take excep-tion to this article. If all that use anual were to get after us we would call their name legion, but we are upheld in our action by some of the most sensible mothers in town in entering a protest against a habit the adoption of which by a girl is almost as much to be dreaded by a parent as is the first taste of liquor deplore and disavow.

llow inflation Worked a Hun-dred Years Ago. The Difference of the property o

The Philadelphia Ledger says: During the last elections in the States it will be temembered that Wendell Phillips wrote a brilliant and nonsensical letter on the surface of the property of the latters work of self-sensition had been less complete than it was, As it is, Mr. Schurz made a valuable addition to the mass of argument and illustration which demonstrates the abstractive of the inflation theory. By the surface some work of self-sensition which demonstrates the abstractive of the inflation theory. We

The Bread We Eat.

A valuable article appears in the Boston Journal of Chemistry upon "Wheat Flour as a Nerve Food," which has been supplemented by an important lecture by the author (Dr. Cutler, of Massachusetts), upon the general subject, with special view to answering the question, "Is flour (white) our proper food?" Dr. Cutler has for a long time been engaged in extended researches upon the "effect of flour-eating upon the human race."

Among the points made in his lecture is that flour is the only impoverished food used by mankind—impoverished food used by mankind—impoverished food to the wheat, leaving the internal starchy or white portion. Flour is mostly or white portion of the wheat, leaving the internal starchy or white portion. Flour is mostly or white portion. Flour is mostly or white portion to the control of the control of the whole broad of them—as I have had my "easy method" of the wheat, leaving the internal starchy or white portion. Flour is mostly or white portion or the part of the local editors of the general newspapaires (your own of the general newspapaires (your own the general newspapaires (your own the listed is displacedarie. In the listed is displacedarie in the last few months ince the listed is displacedarie. In the listed is displacedarie withdrawal of the tegumentary portion of the wheat, leaving the internal starchy or white portion. Flour is mostly starch, 64.7 per cent. The human body contains at least twelve elements besides those of starch. How then, it is naked, can flour be nutritious with about three elements, when it should contain fifteen elements in order to properly congrish and sustain the human body? now warn them not to trifle with the rights of an authaire. are still the most thorough and searching cathartic medicine that can be employed; cleansing the stomach and bowels, and even the blood. In small thoses of one pill a day, they stim the digestive organs and promote orous health.

orous health.

Ayen's Pills-have been known for more than a quarter of a century, and have obtained a world-wide reputation for their virtues. They correct diseased action in the several assimilative organs of the body, and are so composed that obstructions within their range can rarely withstand or evade them. Not only do they cure ous diseases that have ballled the best of human skill. While they produce powerful effects, they are, at the same time, the safest and best physic for children. By their aperient action they gripe much less than the common

ness comes from starch, and the whiter the bread the more starch it contains, and, of course, the less nutrition. The whiteness of floor is regarded by Dr. Cutler as an outward sign of the starration and death within. "What is wanted," says an intelligent writer on this subject, "is a wholesome, healthful, nourishing wheat food—a whole wheat flour in the fullest and broadest sense of the term. It should be made from the choicest, repeat wheat, wholly (bran, or certical portion, and all) reduced to a uniform lineness of quality, and well put up for family use; and whoeyer will give his carnest and honest efforts to furnishing such a flour, and will keep its manufacture up to this high standard all the time, will confer a lasting benefit upon his race and generation, and find a renumerative market for all he can produce."

Sund Dipping Destroys Beautythey gripe much less than the common purgatives, and never give pain when the bowels are not inflamed. They reach the vital fountains of the blood, and strengthen the system by freeling it from the elements of weakness.

Adapted to all ages and conditions in all climates, containing neither calomel nor any deleterious drug, these Pills may be taken with safety by anybody. Their sugar-coating preserves them ever fresh and makes them pleasant to take; while being purely vegetable, no harm can arise from their use in any quantity. PREPARED BY
